**Subject:** Response to Reporting Comprehensive Long-Term Projections

The need for long-term projections is NOW not 2010I propose that as soon as the FY2008 Financial Report is issued the GAO/FASAB produce a separate that addresses the Future and Crisis.

This report may include the elements addressed by the ED and have the simplicity and impact of IOUSA..It should include events subsequent to 9-30-08

Part 1=Address the social Insurance issues.The financial Statement (page 51) should include the effect of the rescue package,any stimulus legislation and the INTEREST effect of these actions..Illustration 3,4 and 5 are the impact charts.

Part 2-Show all guarantees of the government including the activities of the FEDERAL RESERVE.

Part 3-Discuss the trade deficit and the impact of foreign ownership on our government and ownership of our private corporations.

Part4-Show the investment in banks and other financial institutions and the potential for repayment or redemption

Part 5- What will these events have on the value of the US dollar and inflation.

Part 6- Suggested solutions and the possible effect on these projections.Add proposed deadlines for Congress to act
